NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds:

Handwashing and sanitizing products (Category Code E2): Combination of detergents-germicides (single step preparations designed to combine hand washing and sanitizing) will be considered for registration on the basis of their ability to effectively clean the hands as well as their germicidal equivalency to 50 ppm available chlorine. The hands need not be washed with soap or detergent prior to the use of such preparations. However, the hands must be rinsed with potable water after the use of the product and before handling food.

Hand sanitizing products (Category Code E3): Products manufactured from those solutions described in CFR Title 21, Section 178.1010, which are applicable for the purpose may be used to sanitize the hands of employees handling food products without a subsequent rinse provided they are germicidally equivalent to 50 ppm available chlorine. Products shall not contain perfumes leaving a residual odor on hands after usage. These sanitizing solutions may be used only after thoroughly washing hands with soap or detergent and water, followed by rinsing with potable water. In many instances, these hand sanitizers may be injected directly into wash/rinse water.

CE
The CE marking (an acronym for the French "Conformite Europeenne") certifies that a product has met EU health, safety, and environmental requirements, which ensure consumer safety. Manufacturers in the European Union (EU) and abroad must meet CE marking requirements where applicable in order to market their products in Europe.

CSFM

Following our receipt of UL and/or FM approval for those items, the results were submitted/accepted by California. The State of California is generally regarded to have the most stringent fire codes of all the United States. For an annual fee (every June 30th) the CSFM listings are updated.

Decorative Waste products that are UL Listed/FM Approved Fire-Safe/Self-Extinguishing and UL Classified are listed by the California State Fire Marshal pursuant to section 13144.1 of the California Health and Safety Code. See CSFM Listing No. 4480-1025:100.

FM
Factory Mutual is an independent testing agency whose approvals are based on Standard 6921 Combustible Waste Containers. Standard 6921 is performance criteria for containers with covers (lids) and their ability to withstand internal fires, maintain a certain range of stability, if dumped, and stay intact over a wide temperature range. Standard 6920 is performance criteria for Oily Waste Containers.

GREEN SEAL
